

RAJALAKSHMI ENGINEERING COLLEGE

Experiment 6: Data Visualization Using Power BI

Name	Kabilan S	Register No.	241501502
Department	AIML	Year / Semester	III / V

AIM

To learn the Power BI Desktop workflow by connecting to data sources, creating visualizations, using calculated fields and measures, and assembling an interactive dashboard.

SOURCE

EXPT6/exp 6 fdva.pdf

CODE / SOURCE

Not applicable to this GUI-based Power BI Desktop experiment. The completed repository contains the visual output record but no Python notebook or source file; no code has been invented.

EXECUTED OUTPUTS

The original completed Power BI Desktop screenshots are preserved on the following pages.

RESULT

The Power BI dashboard was created and executed successfully.

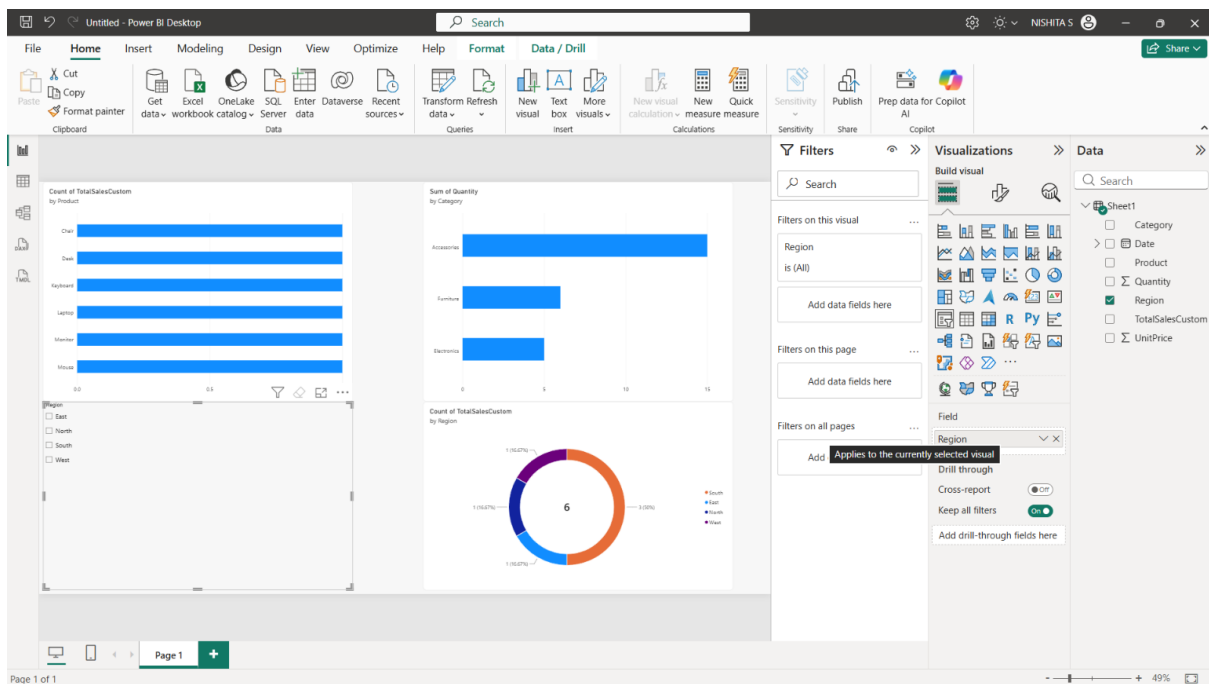

VI. Data Visualization Using PowerBi

AIM:

To learn the Power BI Desktop interface and workflow by connecting to Excel/CSV/SQL data

sources, creating basic visualizations (bar, line, pie), writing calculated columns and measures

(DAX), and assembling an interactive dashboard that answers simple business questions.

RESULT:

Thus, the given program was written and executed successfully.
