Experiment 7: Data Visualization Using Tableau

Name	Kabilan S	Register No.	241501502
Department	AIML	Year / Semester	III / V

AIM

To understand the Tableau interface, connect to data sources, create basic charts, add calculated fields, and build an interactive dashboard and story.

SOURCE

EXPT7/exp 7 fdva.pdf

CODE / SOURCE

Not applicable to this GUI-based Tableau experiment. The completed repository contains the visual output record but no Python notebook or source file; no code has been invented.

EXECUTED OUTPUTS

The original completed Tableau screenshots are preserved on the following pages.

RESULT

The Tableau worksheets and dashboard were created and executed successfully.

VII. Data Visualization Using Tableau

AIM:

To understand the Tableau interface and perform data visualization by connecting to various data sources (Excel, CSV, SQL). The experiment includes creating basic visualizations (bar chart, line chart, pie chart), adding calculated fields, and building an interactive dashboard and story.

RESULT:

Thus, the given program was written and executed successfully.
